

Bugs Identified & Fixes

Bugs:

- 1 Home route only accepted POST requests; GET was missing.
- 2 Form used GET method by default but backend expected POST.
- 3 request.args was used instead of request.form.
- 4 No handling for empty notes (None values added).
- 5 Page refresh caused resubmission issue.

Fixes Applied:

- 1 Allowed both GET and POST methods.
- 2 Explicitly set form method to POST.
- 3 Used request.form to fetch input data.
- 4 Added validation to avoid empty notes.
- 5 Used redirect after POST (Post/Redirect/Get pattern).
